

Case study

Alderley plc

“We realised that productivity and security had to go hand-in-hand. Our employees need access to our applications when traveling or working from home without compromising our network infrastructure. The combined SecurEnvoy and Juniper® Networks solution meets all these requirements”. *Arun Cappi, Group IT Manager*

Alderley plc selects SecurEnvoy's SecurAccess Software to provide them with the necessary security to enable employees to use remote access across the internet.

Arun Cappi comments “After studying the marketplace carefully we selected SecurEnvoy because it allows us the flexibility of strongly authenticating our remote users without the burden of managing additional hardware tokens or smartcards”.

“We chose this solution over others because of its innovative use of sending six digit passcodes via our existing mobile phone infrastructure. We particularly like SecurEnvoy's approach of sending the next required passcode after authenticating. This ensures our users can always access their data, even if they are temporally out of signal range”.

“The total cost of ownership is an important issue. The ease of installation and ongoing administration makes the solution cost effective. SecurEnvoy's System integrates directly into our central Active Directory database preventing the unnecessary burden of recreating users or trying to keep them in synchronisation.

About Alderley plc

Alderley plc is an international company providing engineering services and skid mounted process equipment to the oil and gas, energy, chemical and process industries.

The group's headquarters are in South Gloucestershire in the United Kingdom.

It has worldwide engineering and assembly facilities in Gloucestershire and Jebel Ali FreeZone, UAE and regional offices in Moscow and Batam Island Indonesia

SecurAccess:

Authentication for the modern business

SecurAccess from SecurEnvoy turns any mobile phone that can receive SMS into a ready made authentication device. This pioneering zero-footprint solution cuts costs by using hardware that is already in circulation.

Unlike traditional tokens that take months to deploy and replace, SecurAccess can roll out more than 15,000 new remote staff per hour without the pain, cost or environmental impact created by legacy hardware distribution.

The solution fully integrates into Microsoft Active Directory, Novell eDirectory, Sun Directory Server and OpenLDAP. Integration is simple as it requires no additional databases or hardware – not to mention their associated cost.

SecurAccess also integrates with all leading remote access servers and web services including Microsoft OWA, Citrix, Juniper and Cisco.

There's also no need for extra software, eliminating costly and time-consuming testing and training schemes. SecurEnvoy has been designed to respond to the constant changes in mobile technology to ensure a competitive ROI.

Worried about network coverage or SMS delivery delays?
SecurAccess is fundamentally designed to let you:

- Pre-load one-time passcodes
- Reuse session passcodes that change daily or after multiple days
- Request temporary passcodes through self-help website
- Obtain passcodes via email if necessary

SecurAccess is changing the game for business security. No tokens, no fuss...
Just rock solid, two-factor security on the move.

For more information about SecurAccess or SecurEnvoy's other products, visit www.SecurEnvoy.com.

About SecurEnvoy

SecurEnvoy are the inventors of tokenless authentication and provide two-factor authentication via mobilephones. Passcodes are sent to the user's mobile phone in order to access corporate internal networks, cloud based services or private emails.

SecurEnvoy's products - SecurAccess, SecurPassword, SecurICE and SecurMail - are adopted worldwide.

Customers benefit from reduced support time, no database management as existing LDAP servers are used and zero footprint as no token deployment is required, so ROI for organisations is relatively high.

SecurEnvoy distributes through the channel, providing customers the value added benefits of working with

local partners. It has built up a technical and sales

infrastructure that supports most languages and

cultures around the world. Partners include: Juniper, Citrix, Fortinet, Sonic Aventail, Cisco, Checkpoint, Celestix, Microsoft and F5. SecurEnvoy's customers include T-Mobile, Symantec, John Lewis, NHS and Save The Children.

Founded by Andrew Kemshall and Stephen Watts in 2003, SecurEnvoy is based in Theale, Berkshire.
