

Case study
SBJ Insurance Group

“With a myriad of choice for Two-Factor vendors in the Security market, SBJ found SecurEnvoy was a company that wanted to work with SBJ to facilitate a cost effective solution. Not only could they provide security benefits for our Citrix environment, they also designed scalability to expand with our growing remote access strategy”.

Duncan Vinten Administration Director – SBJ Limited

“SBJ was investigating the use of a Two Factor authentication solution that could integrate with our existing Citrix infrastructure. However we found that this was almost impossible as all Two-Factor solutions can only secure a Citrix Web infrastructure. SBJ currently runs a client ICA connection for designated staff. This actually stalled our project rollout for securing SBJ’s Citrix users, as we couldn’t find the appropriate technology. This was further compounded as we needed a single solution that could work and integrate with our anticipated Outlook Web access project”. Comments - Duncan Vinten.

The solution provided by SecurEnvoy was SecurAccess with password push; the innovative approach controlled and updated the Citrix user’s passwords automatically. The user would have a complex PIN of 4-8 characters and the SecurEnvoy server would send a dynamic 6 digit code to the user’s mobile phone. The combination of the two was the user’s Windows Domain password. This allowed a rapid deployment as no additional software was required for the Citrix server or any other Windows logon environment.

“SBJ can now show best practice by implementing Two-Factor authentication of all our remote users. Being governed by the FSA, SBJ like to be one step ahead in terms of security and technology.” Comments - Duncan Vinten.

“SBJ were impressed with the speed of installation, testing and rollout that the SecurEnvoy product allowed. We can concentrate on our core business now that our external systems are secure and consult with SecurEnvoy as our business grows” Comments – Duncan Vinten

About SBJ

SBJ is a UK domiciled top ten corporate insurance broker, administrator and employee benefit consultant. SBJ sources its business primarily from mid sized corporate clients and intermediaries and its last full year turnover was in excess of £60 million.

SBJ provides creative services to a wide range of organisations based in the UK and to independent intermediary partners from around the world.

As a strong and highly motivated group, employing over 700 skilled staff, SBJ is agile enough to give its clients individual attention yet large enough to flex muscles on their behalf when necessary.

SecurAccess:

Authentication for the modern business

SecurAccess from SecurEnvoy turns any mobile phone that can receive SMS into a ready made authentication device. This pioneering zero-footprint solution cuts costs by using hardware that is already in circulation.

Unlike traditional tokens that take months to deploy and replace, SecurAccess can roll out more than 15,000 new remote staff per hour without the pain, cost or environmental impact created by legacy hardware distribution.

The solution fully integrates into Microsoft Active Directory, Novell eDirectory, Sun Directory Server and OpenLDAP. Integration is simple as it requires no additional databases or hardware – not to mention their associated cost.

SecurAccess also integrates with all leading remote access servers and web services including Microsoft OWA, Citrix, Juniper and Cisco.

There's also no need for extra software, eliminating costly and time-consuming testing and training schemes. SecurEnvoy has been designed to respond to the constant changes in mobile technology to ensure a competitive ROI.

Worried about network coverage or SMS delivery delays?
SecurAccess is fundamentally designed to let you:

- Pre-load one-time passcodes
- Reuse session passcodes that change daily or after multiple days
- Request temporary passcodes through self-help website
- Obtain passcodes via email if necessary

SecurAccess is changing the game for business security. No tokens, no fuss...
Just rock solid, two-factor security on the move.

About SecurEnvoy

SecurEnvoy are the inventors of tokenless authentication and provide two-factor authentication via mobilephones. Passcodes are sent to the user's mobile phone in order to access corporate internal networks, cloud based services or private emails.

SecurEnvoy's products - SecurAccess, SecurPassword, SecurICE and SecurMail - are adopted worldwide.

Customers benefit from reduced support time, no database management as existing LDAP servers are used and zero footprint as no token deployment is required, so ROI for organisations is relatively high.

SecurEnvoy distributes through the channel, providing customers the value added benefits of working with

local partners. It has built up a technical and sales

infrastructure that supports most languages and

cultures around the world. Partners include: Juniper, Citrix, Fortinet, Sonic Aventail, Cisco, Checkpoint, Celestix, Microsoft and F5. SecurEnvoy's customers include T-Mobile, Symantec, John Lewis, NHS and Save The Children.

Founded by Andrew Kemshall and Stephen Watts in 2003, SecurEnvoy is based in Theale, Berkshire.
