Products Four patented solutions that have been designed to address the market needs:

SecurAccess enabling trusted people to log on to corporate networks securely, an elegant solution to a serious business problem

SecurPassword enables Microsoft Windows domain users to reset their own password using mobile phones to create two-factor authentication.

SecurICE is a revolutionary approach to the problem of providing access in the event of an emergency; without deploying expensive tokens or cards.

SecurMail meets the challenges of sending email to any recipient securely over the web without the need for prior relationships or exchange of secrets.

Differentiators Tokenless™ solutions now set the standard for two-factor authentication. With zero footprint, simple deployment, immediate end user acceptance and managed deployment tools; SecurEnvoy's Tokenless™ solutions are the defacto solution of choice for the twenty first century.

Growth Making significant growth in every region, SecurEnvoy and partners have expanded its revenue by over 100% year on year. With proven products accepted by companies and organizations across the globe, this growth is forecast to continue in our current five year business plan.

Customers Broad base of business professionals from around the world including Architects, Banking, Finance, Insurance, Government, Manufacturing, Marketing, Retail, Telecommunications, Charity, Legal, Construction and Technology.

Partners Juniper, Citrix, Fortinet, Sonic Aventail, Cisco, Checkpoint, Celestix, Microsoft, F5 and others.
