

The black logo should be used on white/light backgrounds as the main logo.

The white logo should be used on a black background or, preferably, on the blue lights image banner. The logo should be positioned to the left of the blue lights - not over the blue lights.

The SecurEnvoy APP icon should be used in all material where the APP is mentioned. When used on a white background the plain version should be used. When used on a black background the icon should show a reflection.
